# Good Practices

Project structure

- Each type of file in its folder
  - CSS in /css
  - Media in /media
  - Images in /img
    or in /media/img

- Meaningful names

- Main html: index.html

Download your libraries

Always download all used libraries. Why?

Because we depend on them

+

We cannot be sure that we always will be able to access them

↓

Our web page may not work properly / security errors

Naming files

- All file names should always be **lowercase**

- No spaces, use "-" or "_" to separate

- No symbols like "$" or "%"

- No accents like "á" or "í"

Coding

- Always indent

- Meaningful names for variables and functions

- Names with no special chars

- Simple code, without repetitions

- Comments if the code is long
